

CONTENTS

Foreword	viii
Preface	ix
Convection of Microstructures by Incompressible and Slightly Compressible Flows	1
<i>T. Chacon and O. Pironneau</i>	
Oscillations in Solutions to Nonlinear Differential Equations	23
<i>Ronald J. DiPerna</i>	
Geometry and Modulation Theory for the Periodic Nonlinear Schrödinger Equation	35
<i>M. Gregory Forest and Jong-Eao Lee</i>	
On High-Order Accurate Interpolation for Non-Oscillatory Shock Capturing Schemes	71
<i>Ami Harten</i>	
On the Weak Convergence of Dispersive Difference Schemes	107
<i>Peter D. Lax</i>	
Nonlinear Geometric Optics for Hyperbolic Systems of Conservation Laws	115
<i>Andrew Majda</i>	
On the Construction of a Modulating Multiphase Wavetrain for a Perturbed KdV Equation	167
<i>David W. McLaughlin</i>	
Evidence of Nonuniqueness and Oscillatory Solutions in Computational Fluid Mechanics	197
<i>J.W. Nunziato, D.K. Gartling, and M.E. Kipp</i>	
Very High Order Accurate TVD Schemes	229
<i>Stanley Osher and Sukumar Chakravarthy</i>	
Convergence of Approximate Solutions to Some Systems of Conservative Laws: A Conjecture on the Product of the Riemann Invariants	275
<i>Michel Raschle</i>	

Applications of the Theory of Compensated Compactness	289
<i>M.E. Schonbek</i>	
A General Study of a Commutation Relation given by L. Tartar	295
<i>Denis Serre</i>	
Interrelationships among Mechanics, Numerical Analysis, Compensated Compactness, and Oscillation Theory	309
<i>M. Slemrod</i>	
The Solution of Completely Integrable Systems in the Continuum Limit of the Spectral Data	337
<i>Stephanos Venakides</i>	
Stability of Finite-Difference Approximations for Hyperbolic Initial-Boundary-Value Problems	357
<i>Robert F. Warming and Richard M. Beam</i>	
Construction of a Class of Symmetric TVD Schemes	381
<i>Helen Yee</i>	
Information About Other Volumes in this Program	397
